

# FORD BRONCO OWNER CHECKLIST for DELIVERY (OCD)

\*\*Revision 20\*\* Feb 2, 2022

Created/updated by: Bronco6g member @Cat

---

## ● Ford Pass Rewards Points & \$\$:

- 42,000 points (~\$210) - standard amount of points for buying a new gasoline-powered Ford vehicle
- 20,000 points (~\$100) - Bonus points for reserving a Bronco before December 2020
- 200,000 points (~\$1000) - For those who ordered a First Edition OR specifically ordered the shadow-black painted hard top option or the dual-top option. This was originally an option available on the upper-trim Broncos, but they canceled that option in March due to the part shortages
- The 11,000 points is a promotion if you used your FordPass Visa credit card for a purchase
- Customer Satisfaction Funds: up to a \$1,000. Have your dealer go to the FDAD CLAIM PAGE on the Dealers Bronco Dashboard, if they don't know about it. They can go into the Bronco Readiness dashboard. All the information about this program including their limit is in there. It doesn't cost the dealership anything to do this. Ford reimburses them.
  
- Bronco Swag Bag (varies by Dealer)

Extended Warranty: [Floodfordesp.com](http://Floodfordesp.com).

Sample deals:

PremiumCare 8yr/100K \$0 warranty for \$2060.

8 yrs 100,00 miles. \$1600 to Flood for 8/100,000. \$200 deductible.

[https://www.floodfordesp.com/esp\\_pl...2=0&Surcharge5=0&Surcharge3=0&Submit=Continue](https://www.floodfordesp.com/esp_pl...2=0&Surcharge5=0&Surcharge3=0&Submit=Continue)

Can use FordPass Points (see FAQs.)

Here is Ford Protect: <https://fordprotect.ford.com/extended-service-plan>

Bronco windshields are prone to damage (\$800 -\$1200 to replace). Ask dealer about a Windshield Protection Package. Compare with your insurance co.

Ensure you receive your Price Protection Certificate for MY21 orders pushed to MY22 orders prior to March 19, 2021. Dealers have a system called Smart VINCENT that will provide a code to apply to the vehicle for the price protection.

## Inspection Checklist (based on Bronco6g OP repetitive feedback):

### Mechanical

- Pulley rub/ proximity next to radiator hose
- Coolant hose clamp tight
- Battery terminals tight (negative loose)
- Check all three bolts in the fuse box for looseness
- Turbo Charge Air Cooler Hose securely attached to the Charge Air Cooler Pipe (these are the big black tubes in the engine compt)
- Roll all windows up at once
- Check window auto-drop for excessive snag/wobble. Reset windows by holding switches down for 10 secs.
- Check tailgate window wires for proper routing (not pinched under plastic cap), & adhesion to defrost "grid"
- Fluids all full (oil, washer, brake)
- Ensure coolant reservoir level is b/t "Min"& "Max". Many coming in low.
- Confirm SEVEN Quarts of oil filled, not six. It's a 7 qt pan with a 6 qt dipstick. Ref: <https://forum/threads/bronco-team-engineering-confirms-7-0-quarts-for-2-7l-engine-oil-change-is-correct.29047/>
- Strut on the back window unglued from the hardtop (why not drilled in??)
- Alternator belt installed backwards (smooth side against pulley)
- Transfer case wire harness rubbing against drive shaft (missing plastic clamp)

### Paint/Exterior

- MIC Hardtop rough/sharp edges, gaps, leaks, roof rattles, popping from guide pins, latches...especially seal in middle
- MIC panels all match in color, not two-tone
- MIC Panels contacting, rubbing body panels, especially around rear corner panels/tailgate. Source os squeaks.
- Soft top frame rubbing, seal alignment, fitment
- Soft top latch operation...no binding, prope operation
- Paint bubbles/paint defects
- Paint overspray on windshield and body panels. (Rough to touch vs. baby/glass smooth)

---

- Missing paint in door jambs/door brackets (may need to remove doors to see hinges in jambs), tailgate, fuel door
- Bumpers are straight (some delivered with crooked/uneven bumpers)
- Ensure housings around shackles (if applicable) are installed correctly. May be loose due to incorrect location/insertion of clips
- Body panel alignment. Especially doors.
- Open/close doors to ensure smooth operation and no rubbing/interference
- Ensure all exterior trim pieces above driver/pax windows are installed
- Hood dents caused by excessive panel bond on cross bars
- No license plate mounting (if mounting alternate location)
- No install of dealer marketing decals or plate frames
- Check underneath for corrosion
- Check for transport damage on windows, windshield and paint
- Check for rail dust (small specs of rust that will corrode). Must be clay barred off and repainted, or try iron/rust remover
- Check all shackles for proper hole drill-out. (Unbelievably, one got installed with no hole)

## Interior

- Test all roof latches (some missing)
- Check seat stitching and ensure seats match, including Bronco logos
- Check seat belt webbing for defects
- Ensure upholstery not ripped, damaged or stained (water, grease, etc)
- Sound deadening installed (hardliner)
- Interior and trunk lights/bulbs work
- Owners Manual and Tool kit in glovebox
- Any TSBs/ Service Alerts? A-pillar leak TSB: 21-2403
- Whistling mirrors
- Ensure floor mats are as ordered (Raptor/Warthog/Ranger logo mats installed in Bronco)
- Check for warm air to rear seats. Cause: duct not hooked up.

## Miscellaneous

- Full tank of gas (we paid for it!)
- Door bags
- Mismatched roll bars...holes drilled on one, but not the other
- Ensure all cameras work
